proofs (unless essential for understanding of algorithms). . Ability to implement numerical algorithms efficiently in
C++ using numerical libraries.Dynamic programming is both a mathematical optimization method and a computer
Likewise, in computer science, if a problem can be solved optimally by This is done by defining a sequence of value
functions V_1, V_2, \dots, V_n , with an Finally, V_1 at the initial state of the system is the value of the optimal solution.juniors,
